

# DO YOU KNOW WHERE YOUR TRASH GOES?

It goes straight to the Odiak Pond. We need YOUR help to Clean this Town and Odiak Pond.

The Cordova 7th grade Life Science Class

The trash was even in the water!

*You can help stop this. Instead of ignoring the trash cans on First Street use them! When ever you litter the wind and water flow carries it all the way to Odiak pond or our other waterways.*

*The trash is all over the Pond and is hurting the ecosystem. The plastic can suffocate the young fish and bugs that they eat and they could potentially die.*

*Here is how you can help:*

- *Recycle plastics go behind AC*
- *Recycle cans go to Post Office*
- *Cardboard goes to Burn Pile*
- *Put trash bags in trash cans*
