

Just Pick It Up!

Support By: CHS 7th Grade class, and the Copper River Watershed Project.

The Problem & How we can help

There is too much trash! Salmon, Trout, and other fish and birds all live in Odiak pond and we're polluting it with plastic, soda cans, water bottles, and even some poop that was in a bag. We need to stop this problem now.

1. Securely cover your trash, so it doesn't blow away.
2. If you see a piece of trash just pick it up.
3. If you have trash just hold on to it until you find a trash can.
