

# DON'T POLLUTE!!!

By Josi Moffitt

Every day, Odiak Pond is getting more and more polluted with YOUR trash! All sorts of things from all sorts of places end up in the pond, things like plastic bags, cigarettes, and snack packaging. By harming the plant and animal life, these items harm you, too!

But YOU can do something about it! Pick it up, throw it away, and just don't put it there in the first place! You can help us (the 7th Graders) clean up the pond!
